

SAME-DAY DENTISTRY

Restoring your smile in a single visit with dental crowns!

WHAT IS A DENTAL CROWN?

A dental crown is a hard, protective covering that is placed over a damaged tooth. It improves or restores the tooth's shape and strength, while enhancing its appearance and function in daily activities, like eating and talking.

YOUR SOLUTION FOR:

A broken tooth

Severe decay

Cosmetic concerns

Root canals

DENTAL CROWN OPTIONS:

TRADITIONAL

"lab-made" or "traditional" crowns

These types of crowns involve taking manual impressions, multiple visits to the dentist, and tooth preparation.

Because their fabrication process takes days or weeks, temporary crowns are often provided, which may not fit properly and can be uncomfortable.

SAME-DAY (CEREC)

"chairside" or "same-day" crowns

With this advanced technology, your dentist will take 3D digital impressions of your tooth to design your crown, eliminating the need for manual impressions.

The next step involves a high-tech milling machine that crafts your custom crown from a single piece of porcelain in a few minutes. The best part? Everything happens in just one visit!

TRADITIONAL CROWNS:

The downside.

- ✗ The inconvenience of multiple appointments.
- ✗ Potential issues with the temporary crown.
- ✗ Not enjoying all the foods you love.
- ✗ Messy impressions.
- ✗ Waiting weeks for your permanent crown.

SAME-DAY CROWNS:

The upside.

- ✓ Cost is similar to lab-produced.
- ✓ Precise digital impressions.
- ✓ A more natural appearance.
- ✓ Preserve more of your tooth.
- ✓ Reduce hot & cold sensitivity.
- ✓ Get your permanent crown right away.

SAME-DAY CROWN BENEFITS:

You get your new smile today!
What's better than instant gratification?

Saves time!
You won't need multiple appointments.

No temporary crowns or waiting
for a laboratory to fabricate the permanent restoration.

It's all digital!
You can watch us design and fabricate the crown while you wait.

STOP WAITING!

With CEREC technology, we offer high-end professional quality dental solutions **in-house** and **on-demand**.
